

CRISTAL
DE PARIS

*Collection Premium
2023/2*

MARKING
involves making marks to indicate the decorative pattern boundaries to the cutter.

SANDBLASTING
a matt or gloss finish can be obtained through sandblasting. this process is also used for marking logos.

CUTTING
using a diamond-tipped wheel the required decorative pattern is cut in the crystal using wheels of various grains and shapes. some patterns require more than 5 different wheels.

ACIDIC POLISHING
acidic polishing gives cut objects a sparkling, shiny finish by dipping them in a mixture of hydrochloric and sulfuric acid for about 35 minutes. it is essential to properly control this unstable mixture as a variation of 2% to 3% will make all the difference to the quality of the final product.

GOLD HAND PAINTING

MANUAL POLISHING
manual polishing is carried out by applying abrasive slurry to a cork wheel.

PAINTING WITH AIRLESS SPRAYER

BUFFING
visual defects can be corrected and an exceptional finish can be provided by applying polish to a felt buffing wheel.

DIAMOND SAW
to cut the «pâte de verre» button
